

Overview

Brainflo.com creates technological solutions to solve marketing problems. With over 25 years of experience in both marketing and technology, we provide solutions to ongoing marketing problems using the latest technology. With global strategic partners, we provide complete turn key solutions or simple project management to develop complete multi-touch solutions.

Our Mission

Brainflo.com and our partners, blend traditional marketing principles with online, interactive and technology driven solutions. Our goal is to provide outstanding services at the best possible price. To achieve these goals we are constantly innovating and upgrading our services.

Our Technology

Our technology is really what sets us apart from other companies. Leveraging our strategic partnerships allow us access to secure data centers and nationwide fiber networks. In short, because we handle all aspects of your design, implementation and hosting services, you can feel confident that if there is a problem you won't have to deal with five different companies to get your problem solved. This technology is backed with multiple 10 gigabit fiber connections, UPS power and diesel generators insuring a carefree operating environment.

Open For Business

Technology and solutions are no good if they expire with time or are locked down to prevent expansion. All of our solutions are built using standard PHP, MySQL, HTML, Javascript and other standard platforms. This allows your custom solutions to be easily updated and modified as needed, not only now, but also in the future. All our systems can be easily modified to allow complete and secure access either interactively or through manual or automated import/export processes. We conform to your changing needs, maximizing your investment in technology based marketing solutions.

Powered by Samplewise.com

The technology that powers our database system is provided by Samplewise.com. This platform, written in the above standard languages, allow for rapid deployment and expansion while still maintaining security and a consistent user interface. Our system is configured and deployed using the latest stable operating Linux platform with regular security updates and system backups.
